

JOB OFFER: HYDROGEN PROJECT ENGINEER

Presentation of the company

EIFHYTEC is a European company based in Strasbourg, France, specialized in the development and industrialization of hydrogen components for the energy transition. EIFHYTEC has launched an R&D program to optimize existing solutions and develop new products.

Job description

EIFHYTEC is looking for an engineer to support in the design and development of an innovative hydrogen compression technology. The main tasks will include:

- Diverse engineering assignments from thermal and mechanical dimensioning studies to component and system design
- Carrying out technical and economic analyses
- Preparing specification sheets and consulting subcontractors
- Managing prototypes' production in collaboration with subcontractors and partners
- Intellectual property management
- Supervision of trainees
- Managing a R&D budget

Type of contract: fixed-term contract, which can be converted into an unlimited contract.

Salary: To be defined according to the candidate's profile.

Location: Strasbourg and surroundings.

Profile

We are looking for a candidate holding a master's degree or a PhD with an engineering background, preferably in energy sciences, thermal sciences or fluid mechanics, willing to develop or strengthen his/her expertise in hydrogen technologies. Atypical profiles (professional retraining, self-taught, etc.) may also be selected if their relevance and added value are demonstrated. Previous experience in renewable energies or with industrial processes is an asset but is not mandatory.

The candidate must be comfortable with the basics of thermodynamics, mechanics and systems engineering. He/she must demonstrate a high degree of autonomy and a strong ability to take initiatives within a small structure where the involvement of each person has an impact.

We are looking for someone who feels passionately about the energy transition and is open to a long-term collaboration with attractive and career-enhancing opportunities.

Given the European dimension of the team, an excellent command of French and English is mandatory and knowledge of German or another European language is highly desirable.
